Introduction

The PaWdopt application will have two types of users, Namely an Adopter as well as an Organisation Member. Adopters will be able to swipe on dogs to allow the process of adoption to occur and Organisation members will control the administration of the adoption process.

Requirements

To run the application you would need:

- Windows 10 or 11
- Visual Studio Code (Or any code editor with a terminal)
- Docker

Setup

To set up the database:

- `yarn start:db`

To run the backend:

- `yarn start backend`

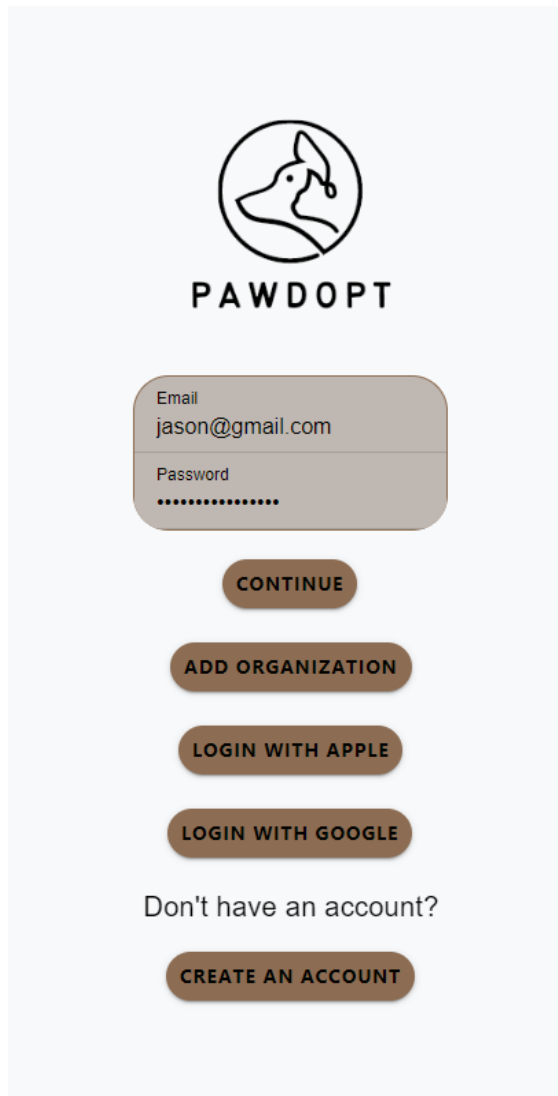

To run application on localhost

- `yarn start`

Using the System

Login page:

- The login page will allow a user to login as an user or organisation member. An user will be redirected to the home page and an organisation member will be sent to the dashboard. If the user does not have an account they can create an account or add an organisation.

The image shows a login page for a system called PAWDOPT. At the top, there is a circular logo containing a stylized line drawing of a dog's head in profile, facing left. Below the logo, the word "PAWDOPT" is written in a bold, black, sans-serif font. Underneath the logo and text is a login form. The form has two input fields: the first is labeled "Email" and contains the text "jason@gmail.com"; the second is labeled "Password" and contains a series of dots. Below the password field is a "CONTINUE" button. Further down are three more buttons: "ADD ORGANIZATION", "LOGIN WITH APPLE", and "LOGIN WITH GOOGLE". At the bottom of the form area, the text "Don't have an account?" is displayed, followed by a "CREATE AN ACCOUNT" button. All buttons are brown with white text and rounded corners. The entire login form is centered on a light gray background.

CREATE AN ACCOUNT

Signup page:

- Signup lets a user sign up, after signing up the users will be redirected to the home page.

PAWDOPT

CREATE ACCOUNT

BACK

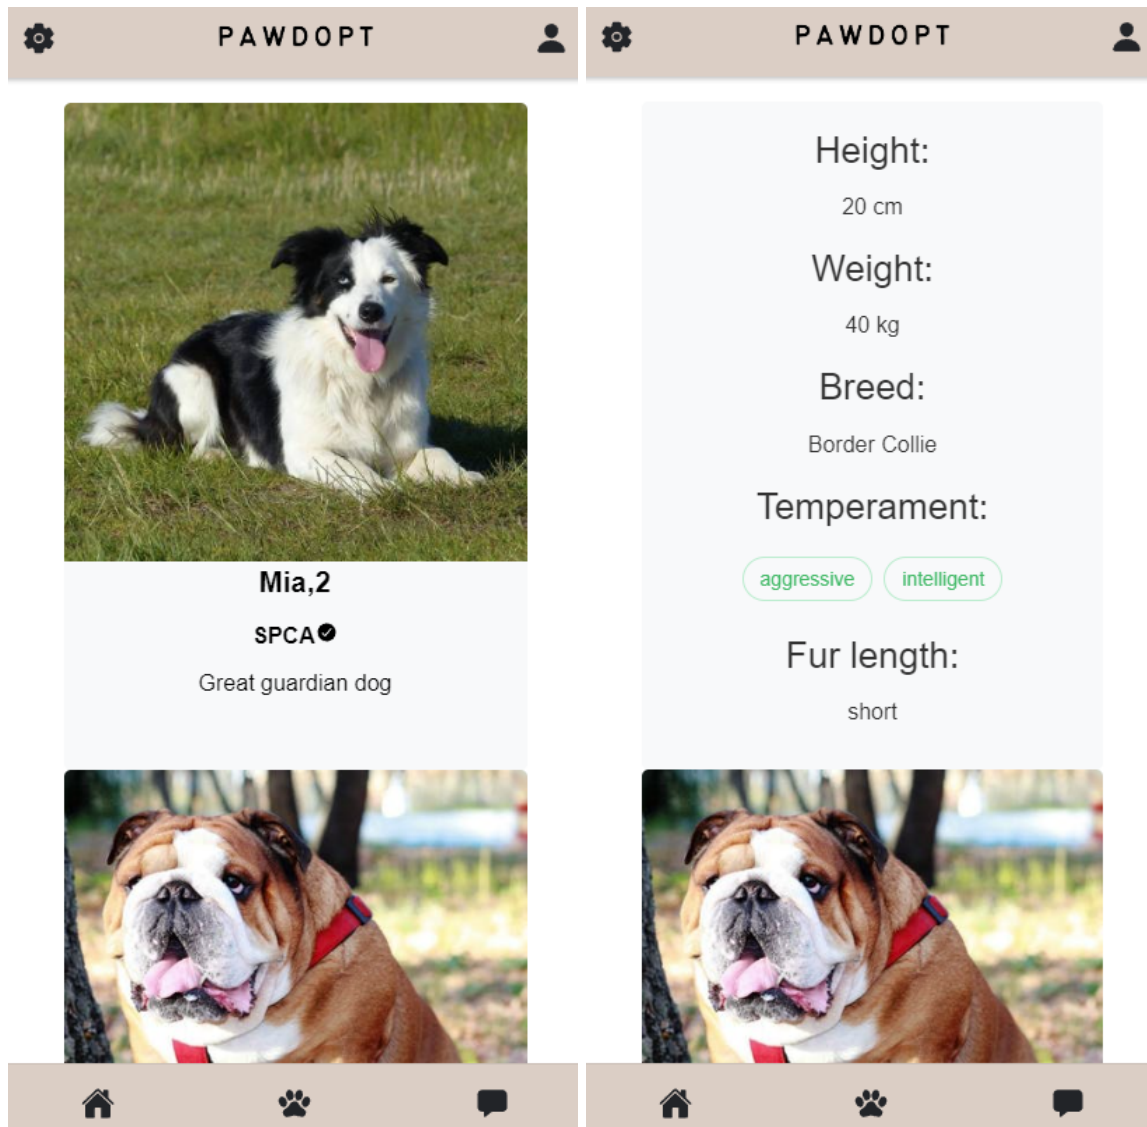

Home page:

- In the home page will allow users to swipe on dogs left or right, right will add dogs to liked dogs, or they can use the buttons. The user can also access their liked dogs at the paw icon.

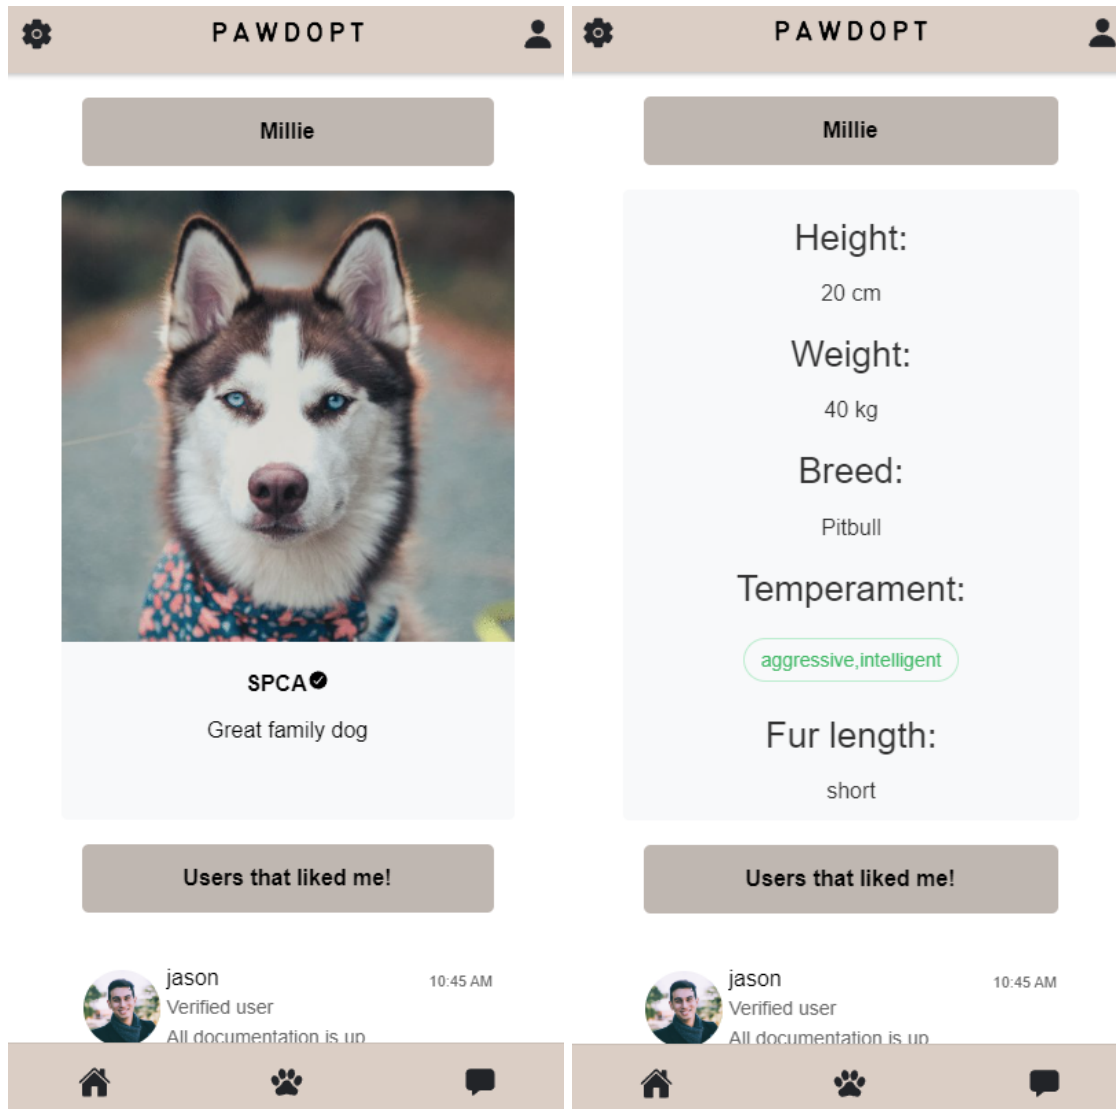

User likes page:

- Here the users can view all of the dogs that they liked. If the user holds down on a specific dog, more information will be shown about the dog.

Dashboard page:

- The dashboard is accessible for organisations members when they log in. This will show all the dogs for the organisation and the users who liked them. The organisation can view the users info. The member can also hold down on the dog to view more information about the dog.

User info page:

- This page will show the organisation member the personal information of a user that liked a dog, they can also access documentation uploaded by the user by clicking on the hyperlinks.

Add dog page:

- Here the organisation can add dogs.

The image shows a mobile application interface for 'PAWDOPT'. At the top is a header bar with a gear icon on the left, the text 'PAWDOPT' in the center, and a user profile icon on the right. Below the header is a large, light gray rectangular area. At the top of this area is a brown button with the text 'CHANGE PICTURE'. Below this is a vertical stack of nine light brown rectangular input fields with rounded corners. The fields are labeled: 'Name', 'Breed', 'Gender', 'Date of birth', 'About', 'Height (in cm)', 'Weight (in kg)', 'Fur length', and 'Temperament'. At the bottom of this stack is another brown button with the text 'ADD DOG'. At the very bottom of the screen is a navigation bar with three icons: a house icon, a paw print icon, and a speech bubble icon.
